Design (Beijing University of Posts and Telecommunications

Publishing House) and supporting materials. Computer

programming is a very practical course. just by reading books or lectures is impossible to fully grasp. the most important part of the design is the practice of the learning process. The

purpose of this writing is to provide some guidance for

students' learning. helping to improve the programming

capabilities of students. fewer students in the course of practice

a few twists and anxious. a little more success fun. to confirm

the actual practice of programming Have you mastered the

content and method of learning. Summary This book is the

book C + +...
